 **H₂O Solutions**

The Highest Water Quality Obtainable at an Affordable Cost!

- ✓ No Capital Investment ✓ No Labor Costs
- ✓ No Equipment Repair Costs ✓ No Chemicals or Hazardous Waste

H₂O Solutions maintains ownership of all tanks and resins. Customers are invoiced based upon frequency of service and number of tanks exchanged.

All resins are double regenerated. This benefit assures our customers of **MAXIMUM WATER QUALITY** with the **LONGEST SERVICE RUNS** in the industry. Tank/Resin life is monitored by means of a conductivity/resistivity indicator light or monitor placed in the deionized water product stream. As water quality decreases the operator is alerted of the need to exchange the deionizer(s). A phone call to H₂O Solutions will initiate service within 24 hours. Our technicians exchange freshly regenerated deionizers for the exhausted units. The exhausted tanks are removed and brought back to our plant for regeneration and sanitization.

Mixed Bed Deionizer

TANKS	GRAINS REMOVAL	GPM	RESIN
